CoNectar

Good things grow between people.

A minimal, sunlit identity for a community that shares skills, resources and mutual support.

BRAND STRATEGY / VISUAL SYSTEM / PRODUCT UI

A little nectar.

A lot of possibility.

01 / The idea

Find your people. Share your nectar.

CoNectar turns the knowledge within a community into something people can find, exchange and build on. The chat is the doorway; human connection is the destination.

Community

Everyone can contribute. Make newcomers feel welcome before asking them to give.

Nectar

Skills, time and resources are valuable. Sharing and charging can coexist openly.

Mutual support

Let collective intelligence connect people without erasing their individuality.

POSITIONING

A shared home for what we know and what we can offer.

02 / Name, mark & voice

CoNectar

Always write CoNectar: capital C and N. The N bridges connection and nectar. Keep the wordmark in one color.

LOGO RULES

Use symbol + name in headers. Use the symbol alone for compact navigation and avatars. Minimum icon size: 24 px. Clear space: half the icon width on every side. Never stretch, recolor, rotate or add effects.

THE HONEY JAR

The supplied honey-jar emoji is the core mark. Choose one licensed emoji artwork for consistent production use; native emoji rendering varies by device.

The jar drawings in this book are schematic previews of the emoji, not replacement logo artwork.

VOICE: WARM, DIRECT, EQUAL

Say: “What would you like help with?”
Say: “Share something you can offer.”
Say: “Session with Ana · €35.”

Avoid guru language, forced bee puns and promises that AI understands everyone. Explain matches through visible skills and member information.

03 / Color is warmth, not noise

Canvas #FFF9EB

Warm, quiet page background

Ink #292B25

Primary text and iconography

Honey #F4C84A

Primary actions and small highlights

Sage #DDE8D3

Gentle supporting accent

Muted #626457

Supporting text

Border #D9D2C3

Dividers and quiet surface edges

80% cream / 15% ink & neutral surfaces / 5% honey or sage

04 / Two modes, one personality

Token	Light mode	Dark mode
canvas	#FFF9EB	#232522
surface	#FFFFFF	#2D302B
text.primary	#292B25	#F8F4E8
text.secondary	#626457	#BBC1B2
border.subtle	#D9D2C3	#454A40
border.control	#858878	#73786C
action.primary	#F4C84A	#F4C84A
focus.ring	#716000	#EBC252

CONTRAST PRINCIPLES

Use dark text on honey in both modes. Never use yellow for body text on cream. Keep subtle borders decorative; controls use the stronger control border token. Free and paid labels always include words.

05 / Typography & rhythm

Aa

A human voice.

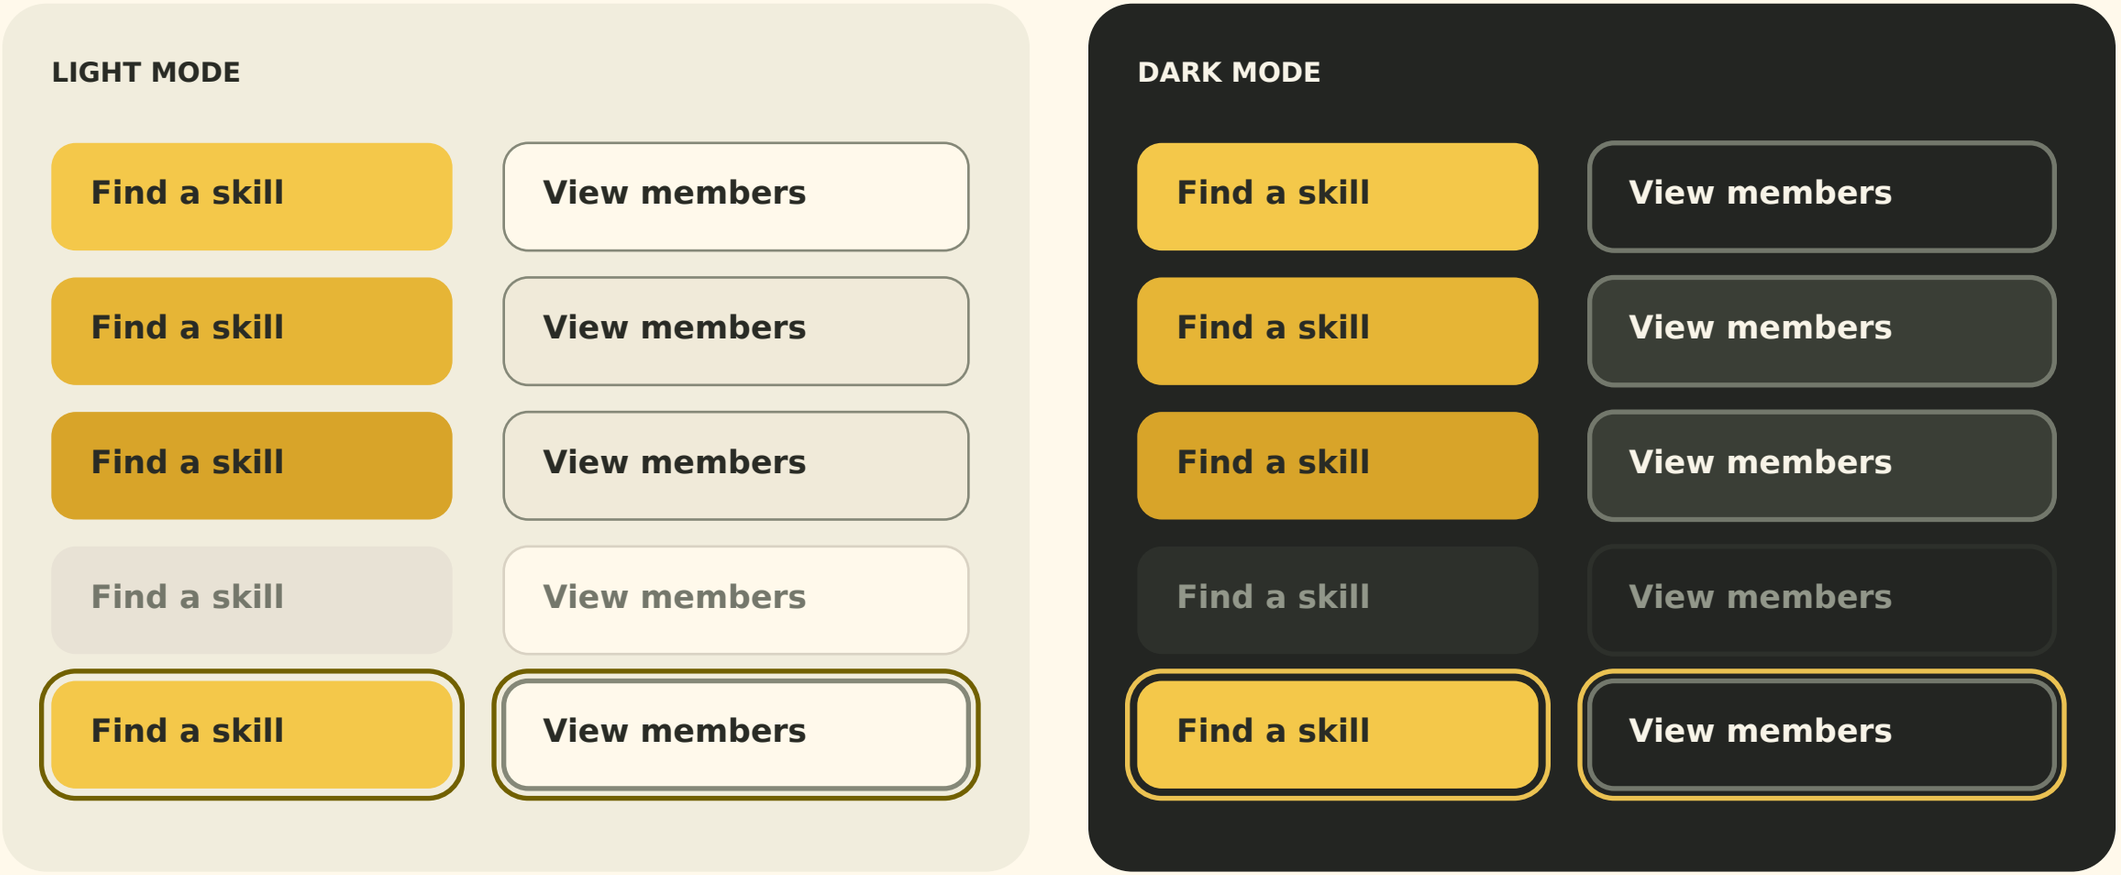

A clear interface.

Production typeface: system sans-serif. Use -apple-system, BlinkMacSystemFont, “Segoe UI”, sans-serif. This book uses DejaVu Sans as a portable visual approximation.

Display	40 / 48 px	Welcome and key brand messages
Heading	28 / 36 px	Page titles
Section	20 / 28 px	Groups and card headings
Body	16 / 24 px	Messages, profiles and resources
Label	14 / 20 px	Buttons, filters and metadata

8 px spacing grid · 12 px card radius · 10 px button radius · 44 px controls

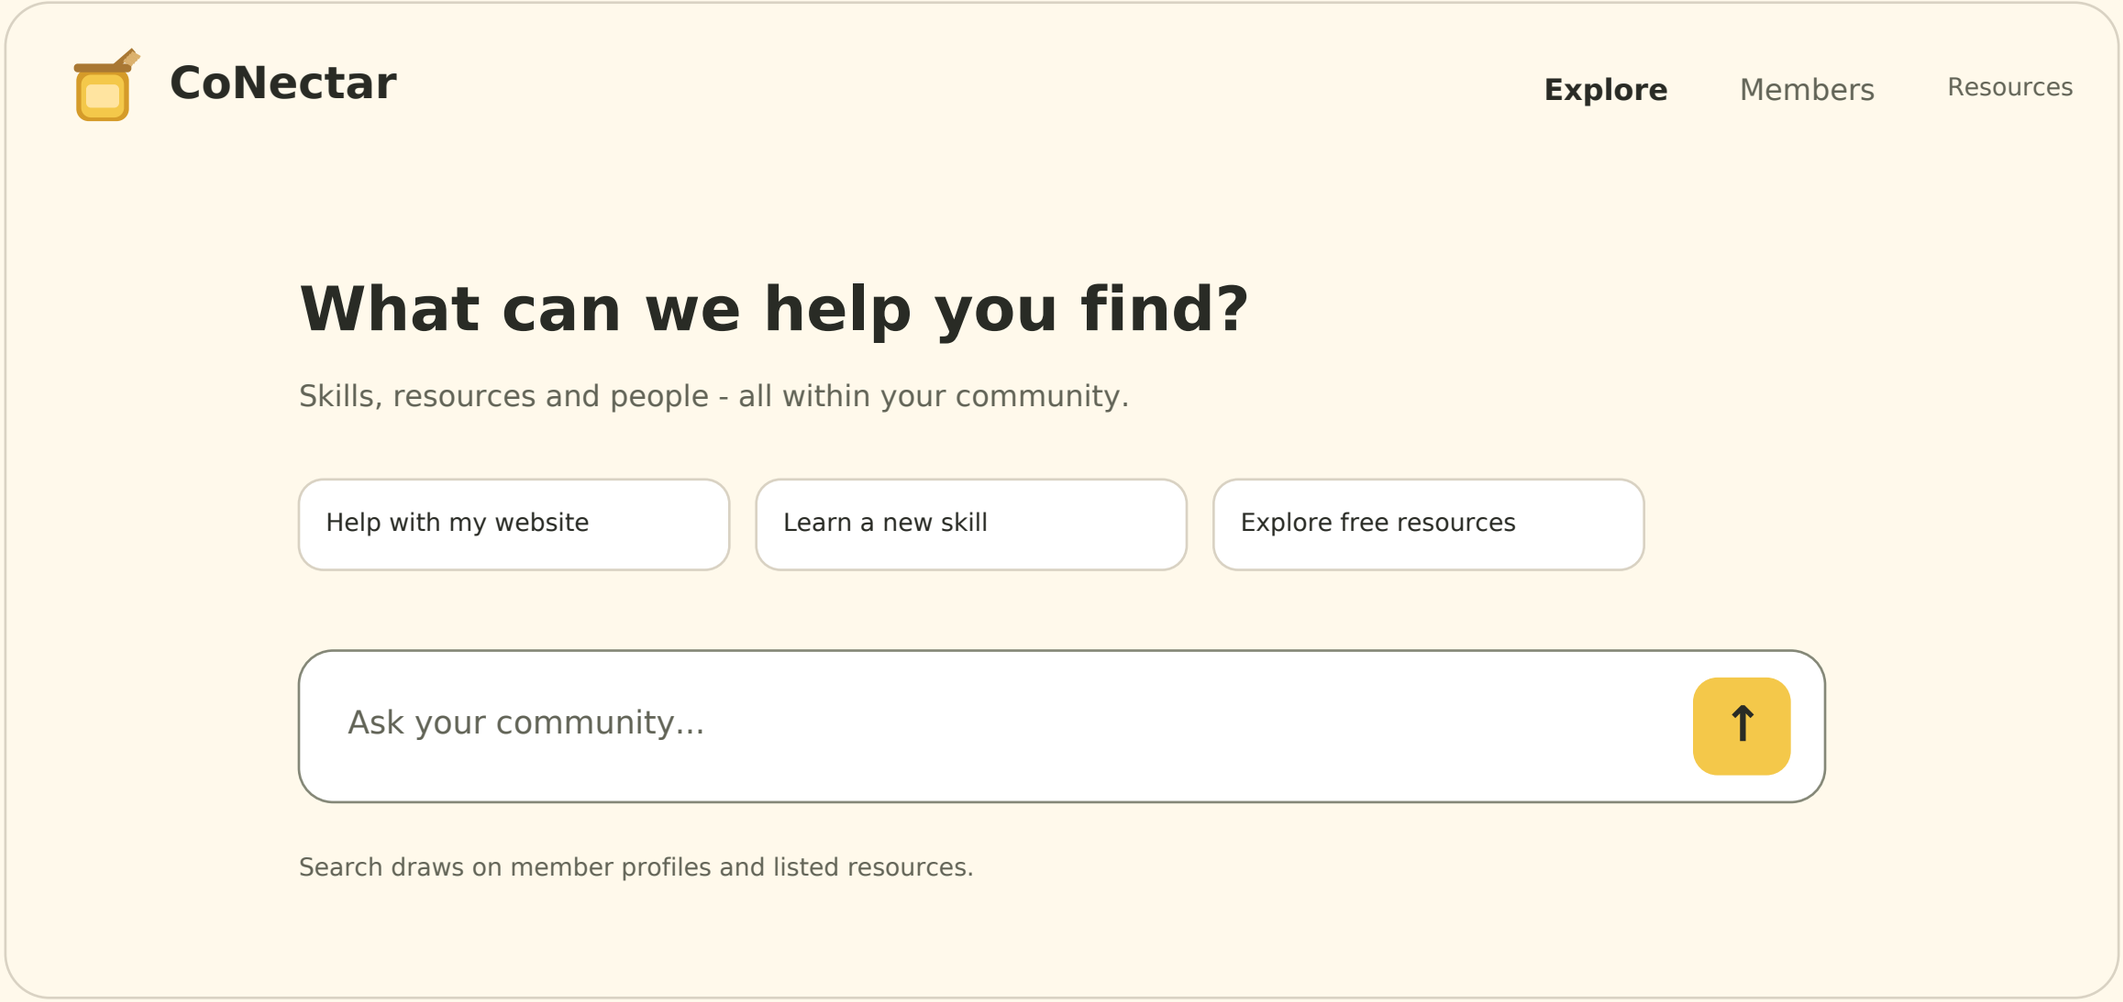

06 / Buttons that feel effortless

Rows: default / hover / pressed / disabled / keyboard focus

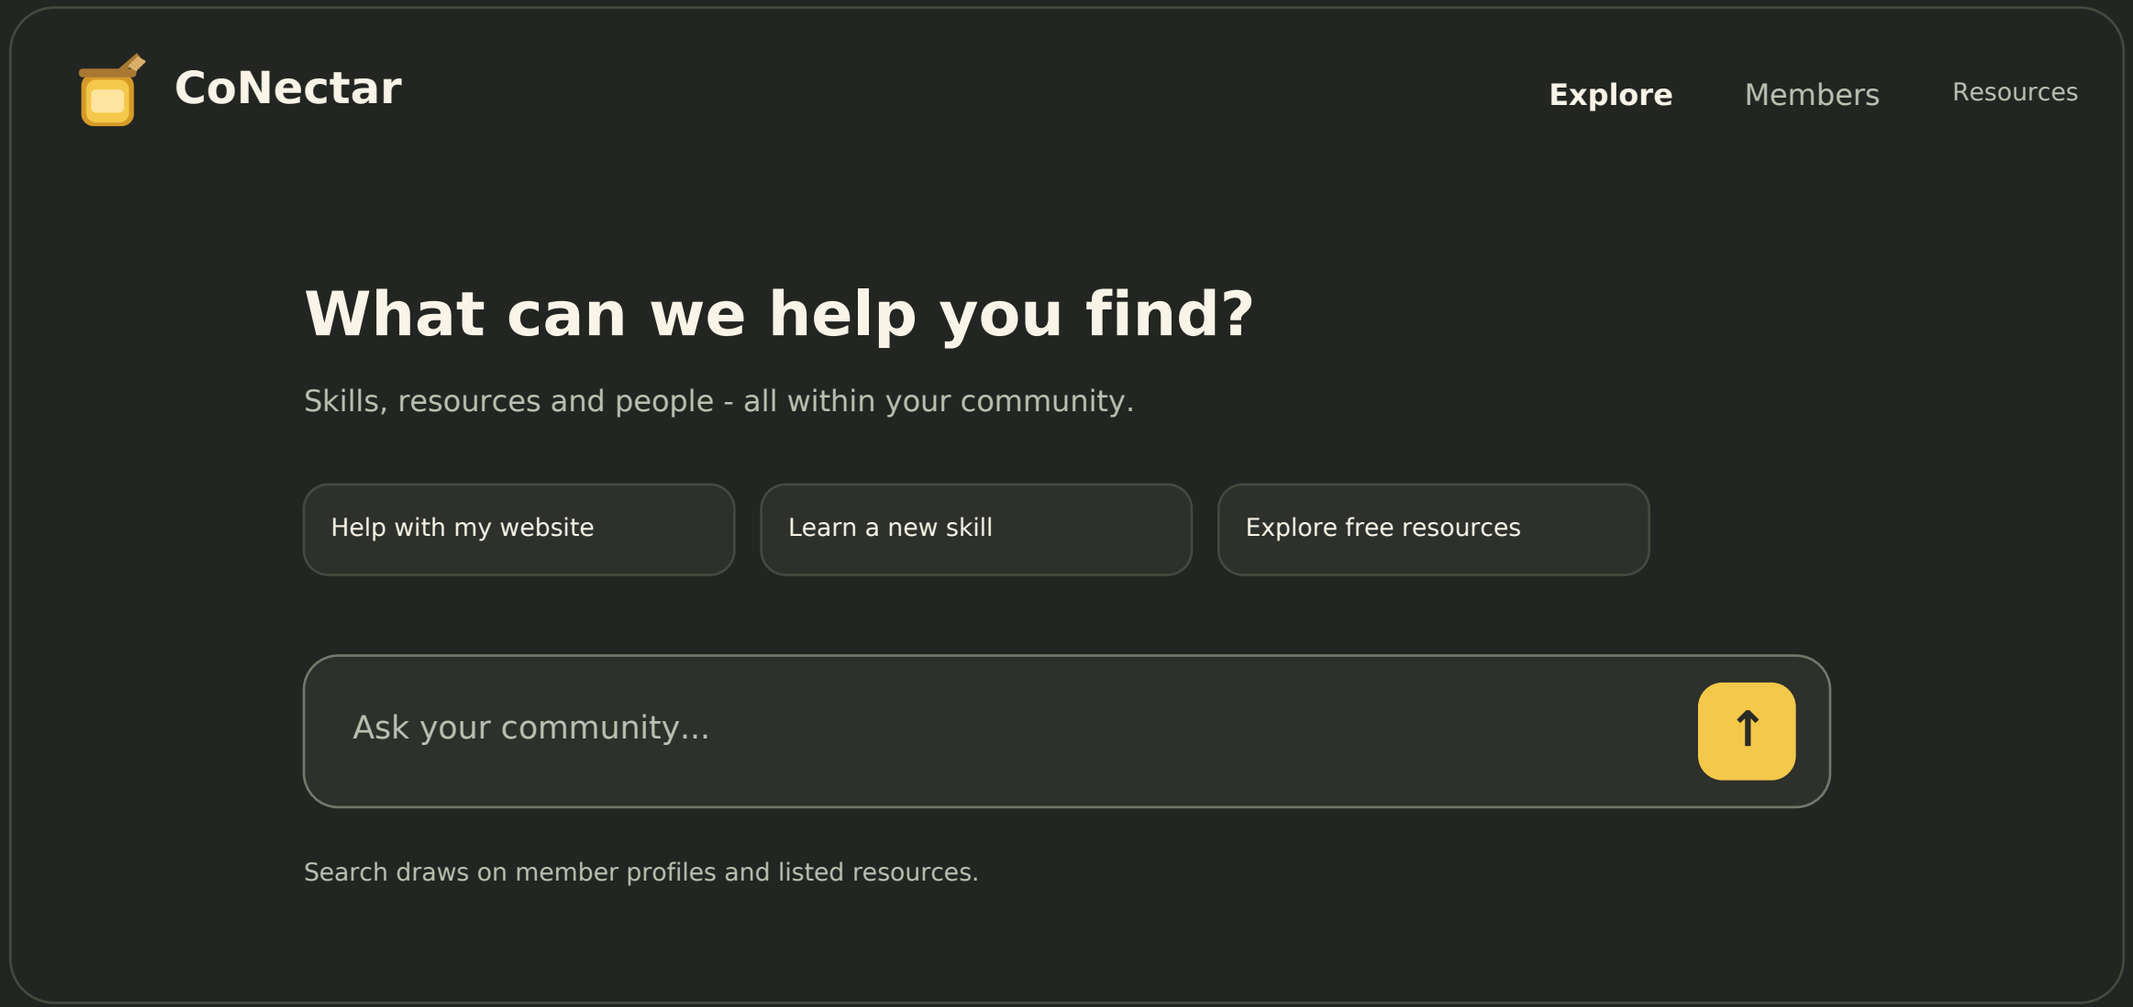

Primary: honey fill, charcoal label. Secondary: transparent fill, control border, primary text. One primary action per section. Use verb-first labels; reserve icon-only buttons for familiar actions with accessible names.

07 / The chat is the front door

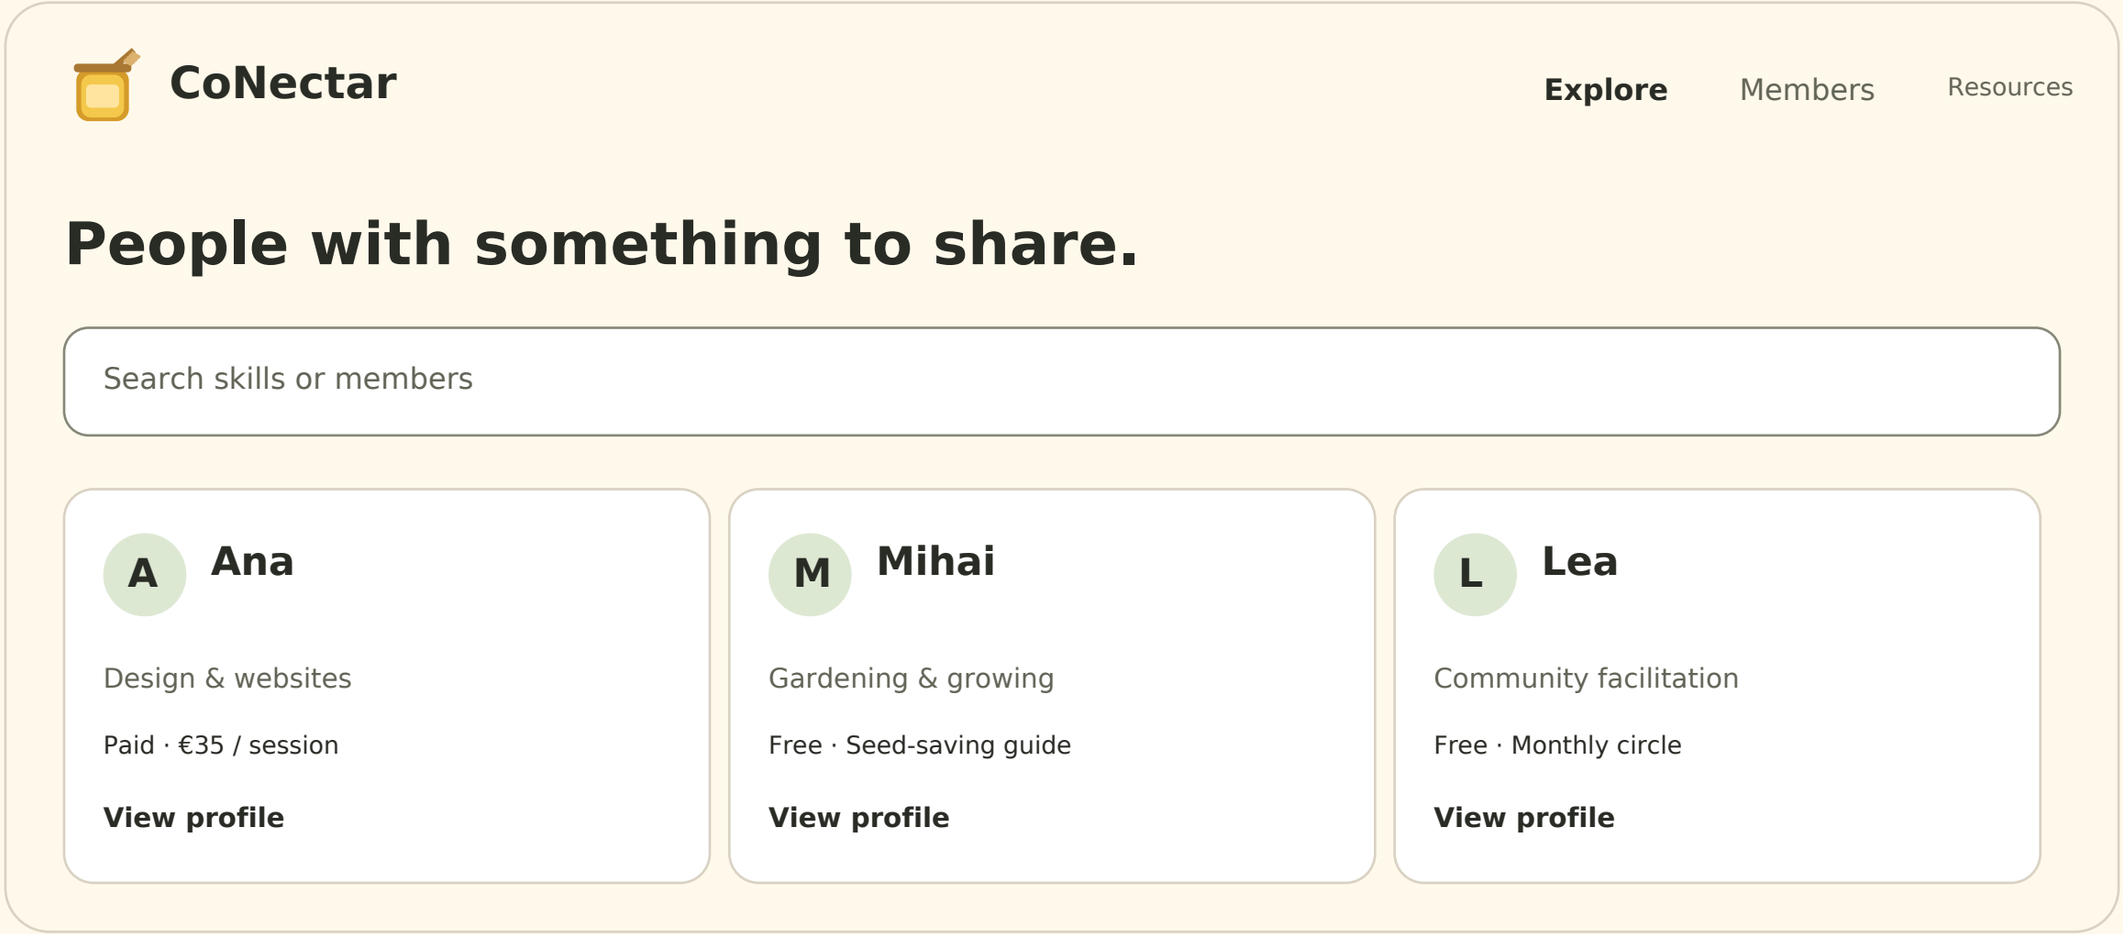

Calm empty state / familiar composer / useful prompts / human-centered navigation

08 / A softer dark mode

Charcoal canvas / raised gray surfaces / warm white text / the same honey action

09 / People before products

Member and resource cards share one visual hierarchy. Show skill, availability and exact price or “Free” before the next step. Currency and billing unit must be explicit. Examples above are illustrative.

10 / Product behavior & handoff

Discovery

Keep the chat column 720 px wide. Return a short explanation and up to three useful matches with visible skills and profile links. Show uncertainty; let people refine their request.

Resources

Use the same card for free and paid offers. Include title, provider, format, price and access action. Use “Open resource” for free content and “View offer” before a purchase.

Responsive & accessible

At 768 px and below, stack cards and collapse navigation. Use 16 px mobile margins and 44 px touch targets. Label inputs, expose focus and respect reduced motion.

Visual restraint

Use whitespace, small seed-like circles and occasional sage surfaces. Avoid honeycomb wallpaper, glowing AI graphics and decorative gradients. Motion: 120-180 ms for simple state transitions.

READY FOR BUILD

Implement semantic color tokens, all button states and system typography. Pin the chosen emoji artwork and license. Verify rendered text contrast, keyboard navigation and both themes before release.
